

## Barrier Wood Floor Sealer

### “A Clear Advantage”

#### Description

Barrier wood floor sealer is specifically designed to penetrate, seal and minimize grain raise. This unique formula reduces tanin bleed tendency, especially with White Oak. Barrier provides a high-build, level surface which enhances the depth and clarity of the overall coating system.

#### Characteristics

- High-build layer minimizes grain raise
- Penetrates and seals bare wood
- Minimizes tanin discoloration
- Provides a level surface for greater depth and clarity
- Non-yellowing
- V.O.C. compliant < 200 g/L

#### Recommended Uses

Residential and commercial wood floors

#### Application Properties

**Coverage:** 500 sq. ft./gal

**Dry Time:** 2-3 hours

**Leveling:** Excellent, applies like a top coat

**Defoaming:** Complete

**Application Tools:** Snow-plow applicator, roller, or brush

#### Packaging

1-gallon F-style containers
